Acknowledgments	xl
Preface	xlii
Abbreviations	xliv
Notes on terminologies used	xlviii
Codes used in siblings' sequence formula	xlix

CHAPTER 1: INTRODUCTIONS

SECTION 1	HISTORICAL PREAMBLE	1
1.1	Historical background	1
1.2	Care for the Blind	3
1.3	St John's Ophthalmic Hospital	4
SECTION 2	HISTORY AND GEOGRAPHY	6
2.1	Introduction on Palestine	6
2.2	The West Bank	7
2.3	The Gaza Strip	9
2.4	Israel	11
2.5	Climate	11
2.6	Topography and terrain	13
2.6.1	Coastal and inner plains	13
2.6.2	Mountains and hills	13

2.6.3	Jordan Valley and the Ghawr	13
2.6.4	Southern desert	13
2.7	Demographic changes	15
SECTION 3	DEMOGRAPHY	18
3.1	WHO world regions	18
3.2	World regions by development status	18
3.3	World Bank classification of countries	20
3.4	Demography of the Arab World and MEC	21
3.5	Demographic trends in the Arab world	22
3.6	Migration in the Arab World	25
3.7	Demographic aspects of the OPT	26
3.8	Population estimates	26
3.9	Age and sex distribution	27
3.10	Population figures	28
SECTION 4	AIMS AND OBJECTIVES	33
4.1	Introduction	33
4.2	Epidemiological	33
4.3	Clinical/Genetic	34
<u>CHAPTER 2: LITERATURE SEARCH</u>		
SECTION 5	EPIDEMIOLOGY AND DATA COLLECTION	35
5.1	Epidemiological studies on blindness	35
5.2	Historical perspective	35
5.3	History of blindness in the Arabia	36
5.3.1	Earlier work	36
5.3.2	Egyptian Figures	36
5.3.3	Palestinian figures	37

5.3.4	Algerian Figures	37
5.4	Blindness in Arabia in the last century	38
5.5	The situation in Europe	39
5.6	History of blindness from trachoma	39
5.7	History of blindness in Africa	40
5.8	Data collection	41
5.9	Definition of blindness	41
5.9.1	Visual acuity as a measure	41
5.9.2	Economic blindness	41
5.9.3	WHO definition of blindness	42
5.10	Blind registration	43
5.10.1	Blind registration in the UK	43
5.10.2	Pitfalls of BD8 certification	43
5.10.3	Trends in registration in the UK	44
5.11	Registrations in other countries	44
5.12	Practical problems in data collections	45
5.12.1	Observer bias	45
5.12.2	Multiple handicaps	45
5.12.3	Variations in definitions	45
5.12.4	Under reporting	45
5.12.5	Different diagnostic criteria in children	46
5.12.6	Visual improvement in children (DVM)	46
5.13	WHO recommended methodology	47
SECTION 6	BLINDING CONDITIONS	48
6.1	Introduction	48
6.2	Age related cataract	48
6.2.1	Prevalence of cataract	48
6.2.2	Aetiology and risk factors	48
6.2.3	Gender in cataract blindness	50
6.2.4	Cataract blindness	50

6.2.5	Congenital rubella syndrome	51
6.3	Age related glaucoma	51
6.3.1	Prevalence of glaucoma	51
6.3.2	Glaucoma screening	52
6.3.3	Risk factors in glaucoma	52
6.4	Diabetic retinopathy	53
6.4.1	Prevalence of diabetic retinopathy	53
6.4.2	Risk factors in diabetic retinopathy	53
6.4.3	Blindness from diabetes	53
6.5	Corneal disease	54
6.5.1	Prevalence of corneal blindness	54
6.5.2	Causes of corneal blindness	54
6.6	Trachoma	54
6.6.1	Introduction	54
6.6.2	Causative factors	55
6.6.3	Factors in trachoma blindness	55
6.6.4	Prevalence of trachoma	55
6.6.5	Epidemiological aspects and trends	56
6.6.6	Preventive measures and strategies	58
6.7	Corneal opacities from non-trachomatous causes	60
6.7.1	Prevalence	60
6.7.2	Measles blindness	60
6.7.3	Measles/VAD/HSK synergism	60
6.7.4	Onchocerciasis, leprosy, TEM and EWCL	61
6.8	Climatic droplet keratopathy	62
6.9	Vitamin A deficiency (VAD)	62
6.9.1	Prevalence of VAD	62
6.9.2	Xerophthalmia	63
6.9.3	VAD in Arab Countries	64
6.9.4	Gender in VAD	64
6.9.5	Epidemiological aspects of VAD manifestations	65

6.9.6	Synergism of xerophthalmia, diarrhoea and measles	66
6.9.7	Xerophthalmia in the MEC	67
6.10	Onchocerciasis	68
6.10.1	Prevalence of onchocerciasis	68
6.10.2	Transmission of onchocerciasis	69
6.10.3	Eradication of onchocerciasis	69
6.11	Ocular trauma	70
6.11.1	Incidence and monocular blindness	70
6.11.2	Landmine injuries	70
6.11.3	Eye injuries in children	71
6.12	Ophthalmia Neonatorum	71
6.12.1	Prevalence of ophthalmia neonatorum	71
6.12.2	Causative factors	71
6.12.3	Prophylaxis	72
6.13	Refractive errors	72
6.14	Retinopathy of prematurity	72
6.15	AIDS	73
6.16	Recreational drugs	73
6.17	Leprosy	73
6.18	War injuries and sanctions	74
SECTION 7	BLINDNESS WORLDWIDE	77
7.1	Global blindness today	77
7.2	Factors influencing blindness epidemiology	78
7.3	Trends in blindness	79
7.4	Blindness in developing countries	79
7.5	Blindness in developed countries	80
7.6	Prevalence in developed countries	81
7.7	Blind registration	81
7.8	Blindness in Europe	82

7.8.1	Blindness in the UK and the Republic of Ireland	82
7.8.2	Blindness in Scandinavian countries	83
7.8.3	Blindness in Germany	83
7.8.4	Blindness in Italy	84
7.8.5	Blindness in Bulgaria and Slovakia	84
7.9	Blindness in America	85
7.9.1	Epidemiological studies in the US	85
7.9.2	Racial differences and the Blacks	85
7.9.3	Characteristics of blindness in the Blacks	86
7.9.4	Prevalence of blindness in the UK	87
7.9.5	Factors influencing disabilities in the US	87
7.10	Latin America and the Caribbean (LAC)	88
7.10.1	Prevalence of blindness	88
7.10.2	Cataract in LAC	88
7.10.3	Trachoma in LAC	88
7.10.4	VAD in LAC	89
7.10.5	Onchocerciasis in LAC	89
7.11	Blindness in Australia	90
7.11.1	Prevalence and racial differences	90
7.11.2	Blindness in the Aboriginals	90
7.12	Blindness in Japan	90
7.13	Blindness in Asia	91
7.13.1	Prevalence	91
7.13.2	Blindness in India	91
7.13.3	Blindness in Bangladesh	92
7.13.4	Blindness in Nepal	92
7.13.5	Blindness in Indonesia	93
7.13.6	Blindness in Malaysia	93
7.14	Blindness in the Western Pacific	94
7.14.1	Prevalence of blindness	94
7.14.2	Blindness in Vietnam	94

7.14.3	Blindness in Cambodia	94
7.14.4	Blindness in the Republic of China	95
7.14.5	Blindness in Taiwan	96
7.14.6	Blindness in Hong Kong	96
7.14.7	Blindness in Mongolia	97
7.14.8	Blindness in Singapore	97
7.14.9	Blindness in Tonga	98
7.14.10	Summary of the blindness in Asia	98
7.15	Sub-Saharan Africa (SSA)	99
7.15.1	Prevalence of blindness	99
7.15.2	Major causes of blindness	99
7.15.3	Size of the cataract problem	99
7.15.4	Corneal blindness	100
7.15.5	Trachoma	100
7.15.6	Blindness East Africa	100
7.15.7	Blindness in Ethiopia	101
7.15.8	Glaucoma in SSA	102
7.15.9	Onchocerciasis in SSA	102
7.15.10	Xerophthalmia in SSA	103
7.15.11	Other causes of blindness in SSA	103
7.15.12	Blindness in South Africa	104
SECTION 8	BLINDNESS IN THE MIDDLE EAST CRESCENT (MEC)	105
8.1	Introduction on Middle East Crescent	105
8.2	Prevalence of blindness in the MEC	106
8.3	Causes of blindness	106
8.3.1	Cataract	106
8.3.2	Trachoma	107
8.3.3	Corneal scars	107
8.3.4	Refractive errors	107

8.3.5	Abuse of topical medications	107
8.3.6	Iatrogenic blindness	108
8.3.7	Diabetic retinopathy	108
8.3.8	Glaucoma	108
8.3.9	Unilateral blindness	108
8.4	Blindness in Saudi Arabia	109
8.4.1	Causes of blindness	109
8.4.2	Trachoma	109
8.4.3	Temporal trends in trachoma prevalence	109
8.5	Blindness in Oman	111
8.5.1	Prevalence of blindness	111
8.5.2	Causes of blindness	111
8.5.3	Trachoma	111
8.5.4	Diabetic blindness	111
8.6	The rest of the Arabian Gulf countries	112
8.7	Blindness in Yemen	112
8.7.1	Eye morbidity	112
8.7.2	Causes of blindness	112
8.7.3	Onchocerciasis	113
8.8	Northern Arabia (Lebanon, Syria and Iraq)	113
8.9	Blindness in Jordan	114
8.10	The Occupied Palestinian Territories	114
8.10.1	Causes of blindness	114
8.10.2	Trachoma characteristics in the OPT	115
8.11	Blindness in Egypt	115
8.11.1	Epidemiology of trachoma in Egypt	115
8.11.2	Prevalence of trachoma	116
8.11.3	Regional variation in the severity of trachoma	116
8.11.4	Visual morbidity of trachoma	117
8.11.5	Factors influencing trachoma	118
8.11.6	Blind villagers	118

8.12	Blindness in Sudan	119
8.12.1	Geographical characteristics	119
8.12.2	Prevalence of blindness	119
8.12.3	Causes of blindness in Sudan	119
8.12.4	Onchocerciasis in Sudan	120
8.12.5	Onchocerciasis in south western focus	120
8.12.6	Onchocerciasis in northern and eastern foci	120
8.12.7	Factors influencing pathology in onchocerciasis in Sudan	121
8.12.8	Ocular disease in onchocerciasis	121
8.12.9	Strategies in tackling onchocerciasis	122
8.12.10	Vitamin A deficiency in Sudan	122
8.12.11	Trachoma in Sudan	124
8.12.12	Diabetic blindness in Sudan	124
8.13	Blindness in Tunisia	125
8.13.1	Prevalence of blindness in Tunisia	125
8.13.2	Causes of blindness in Tunisia	125
8.13.3	Trachoma in Tunisia	125
8.14	Blindness in Morocco	126
8.14.1	Prevalence of blindness in Morocco	126
8.14.2	Causes of blindness in Morocco	126
8.14.3	Trachoma in Morocco	126
8.15	Blindness in Djibouti	128
8.16	Blindness in Turkey	128
8.16.1	Prevalence of blindness in Turkey	128
8.16.2	Causes of blindness in Turkey	128
8.17	Blindness in Iran	129
8.18	Blindness in Pakistan	129
8.19	Blindness in Afghanistan	130
8.19.1	Prevalence of blindness in Afghanistan	130
8.19.2	Causes of blindness in Afghanistan	130

8.19.3	Mine blast injuries in Afghanistan	131
8.20	Other countries in North Africa	131
8.21	Conclusions on world blindness	131
SECTION 9	CHILDHOOD BLINDNESS WORLDWIDE	133
9.1	Global prospective	133
9.1.1	Introduction	133
9.1.2	Regional variations	134
9.2	Impact of childhood blindness	135
9.3	Causes of childhood blindness	135
9.4	Data collection	136
9.5	Gender differences	136
9.6	Childhood blindness in the EME and Europe	138
9.6.1	Introduction	138
9.6.2	Historical aspects	138
9.6.3	Changing patterns	139
9.7	Childhood blindness in the UK and Ireland	140
9.7.1	Prevalence	140
9.7.2	Causes and aetiologies	140
9.7.3	Mental retardation in the UK cohort	141
9.7.4	British Paediatric Surveillance Study	142
9.8	Childhood blindness in the Republic of Ireland	143
9.9	Childhood blindness in North European countries	143
9.9.1	Prevalence	143
9.9.2	Causes of childhood blindness	143
9.9.3	Associated findings in the Nordic study	144
9.9.4	Greenland	144
9.9.5	The Netherlands	145
9.10	Childhood blindness in Germany	145
9.10.1	Prevalence	145
9.10.2	Causes	145

9.11	Childhood blindness in Switzerland	146
9.12	Childhood blindness in the PSE countries	147
9.13	Childhood blindness in France	147
9.14	Childhood blindness in North America	147
9.14.1	Changing pattern in Canada	147
9.14.2	Childhood blindness in the USA	148
9.14.3	Childhood blindness in Australia	150
9.15	Childhood blindness in Latin American Countries and the Caribbean	150
9.15.1	Introduction	150
9.15.2	Childhood blindness in Jamaica	151
9.15.3	Childhood blindness in Chile	151
9.15.4	Childhood blindness in Peru	152
9.15.5	Onchocerciasis in the LAC	152
9.16	Childhood blindness In Sub-Saharan Africa (SSA)	152
9.16.1	The size of the problem in the SSA	152
9.16.2	Causes childhood blindness in the SSA	153
9.16.3	Childhood blindness in Nigeria	153
9.16.4	Childhood blindness in Malawi	154
9.16.5	Childhood blindness in the CAR	154
9.16.6	Childhood blindness in Ethiopia	155
9.16.7	Childhood blindness in South Africa	155
9.16.8	Corneal scarring in Africa	155
9.17	Diversity of childhood blindness in Asia	156
9.18	Childhood blindness in India	156
9.18.1	Prevalence	156
9.18.2	Causes	157
9.18.3	Avoidable blindness	157
9.19	Childhood blindness in Bangladesh	158
9.20	Childhood blindness in Sri Lanka	159
9.21	Childhood blindness in Nepal	159

9.22	Childhood blindness in Indonesia	160
9.23	Childhood blindness in Malaysia	160
9.24	Childhood Blindness in Thailand and the Philippines	160
9.25	Childhood Blindness in Vietnam	161
9.26	Childhood blindness in China	161
9.26.1	Epidemiological studies	161
9.26.2	Causes	162
9.26.3	Avoidable blindness	162
9.26.4	Vitamin A deficiency (VAD)	163
9.27	Childhood blindness in Mongolia	163
9.28	Childhood blindness in Japan	164
9.28.1	Prevalence	164
9.28.12	Changing patterns and role of consanguinity	164
SECTION 10 CHILDHOOD BLINDNESS IN THE MEC		166
10.1	Introduction	166
10.2	Changing pattern	166
10.3	Prevalence	167
10.4	Earliest studies	167
10.5	Childhood blindness in Cyprus	167
10.6	Childhood blindness in Lebanon	168
10.7	Childhood blindness in Saudi Arabia	168
10.7.1	The Eastern Province study	169
10.7.2	Riyadh study	169
10.7.3	Eye referral centre study	170
10.7.4	ROP in Saudi Arabia	171
10.8	Childhood blindness in Oman	171
10.9	Childhood blindness in Kuwait	171
10.10	Childhood blindness in Yemen	172
10.11	Childhood blindness among the Palestinians	172
10.11.1	In Northern Israel	172

10.11.2	The West Bank and Gaza Strip	173
10.12	Childhood blindness in Jordan	173
10.12.1	Introduction	173
10.12.2	Causes	173
10.12.3	Changing patterns	174
10.12.4	Consanguinity in the surveys	174
10.12.5	Recommendations	174
10.13	Childhood blindness in Egypt	175
10.13.1	Causes	175
10.13.2	Avoidable blindness	176
10.13.3	Trachoma in children	176
10.14	Childhood blindness in Tunisia	176
10.15	Childhood blindness in Sudan	176
10.15.1	Prevalence	176
10.15.2	Causes	176
10.16	Childhood blindness in Uzbekistan	177
10.16.1	Demography	177
10.16.2	Prevalence and causes	177
10.16.3	Consanguinity rate	177
10.17	Childhood blindness in Pakistan and Afghanistan	178
10.17.1	Introduction	178
10.17.2	Causes	178
10.17.3	The blind schools and recommendations	178
10.17.4	Afghani children in Refugee camps	179
10.18	Conclusions on childhood blindness	179
SECTION 11	PREVENTION OF BLINDNESS	181
11.1	Prevention tools	181
11.2	History of prevention programmes	182
11.2.1	Prevention programmes	182
11.2.3	Onchocerciasis control programme	183

11.2.3	Prevention of diabetic blindness	183
11.3	Vision 2020	184
11.3.1	Emergence of Vision 2020	184
11.3.2	Implementation, components and tiers	184
11.3.3	Backbone of Vision 2020	184
11.3.4	Development of human resources	185
11.3.5	Building national capacities	185
11.3.6	Transfer of technologies	185
11.4	Conditions addressed by Vision 2020	186
11.4.1	The basis of selection	186
11.4.2	Prevention of age-related blindness	186
11.4.3	Prevention of trachoma	187
11.4.4	Prevention of onchocerciasis	188
11.4.5	Eradicating VAD	189
11.4.6	Emerging diseases trends	190
11.5	Prevention objectives in the MEC	190
11.6	Prevention of childhood blindness (CB)	191
11.6.1	Childhood blindness and Vision 2020	191
11.6.2	Approved targets	191
11.7	Prevention of childhood blindness in the MEC	192
11.7.1	Required measures	192
11.7.2	WHO priorities on the MEC	193
11.7.3	Genetic counselling	193
11.7.4	Steps taken	193
11.8	Conclusions on prevention of blindness	194
SECTION 12	CONSANGUINITY	196
12.1	Definition of consanguinity	196
12.2	Consanguinity throughout history	196
12.3	Invisible consanguinity	196
12.3.1	Genetic non-relatedness	196

12.3.2	Social and geographical isolation	197
12.4	Prevalence of consanguinity	197
12.5	Consanguinity and society	198
12.5.1	Social acceptance of consanguinity	198
12.5.2	Subtypes of first cousin marriage	199
12.5.3	Cultural differences in consanguinity	199
14.5.4	Changing trends and non-acceptance	200
12.6	Marriage patterns among the Palestinians	201
12.6.1	Prevalence	201
12.6.2	Why consanguinity?	202
12.7	Deleterious effects of consanguinity	203
12.8	Genetic counselling	203

CHAPTER 3: PATIENTS AND METHODS

SECTION 13	PATIENTS AND METHODS	204
13.1	Patients and schools	204
13.1.1	Introduction	204
13.1.2	Place of examination	204
13.1.3	Patients	206
13.2	The team	206
13.3	The protocol	206
13.3.1	Protocol forms	206
13.3.2	Questionnaires	207
13.3.3	Natal histories	207
13.3.4	Demographic data	207
13.3.5	Genetic protocol	208
13.3.6	Ophthalmic examination	208
13.3.7	Assessment of visual functions	209
13.4	Data analysis and parameters used	210
13.4.1	Software	210

13.4.2	Visual acuities	210
13.4.3	Classification methods	211
13.5	Additional protocols	211
13.5.1	IQ and Skills	211
13.5.2	Red tinted glasses	211
13.6	Reports to Social Services	211

CHAPTER 4: RESULTS

SECTION 14	PATIENTS, SIBSHIPS AND PEDIGREES	212
14.1	Patients source and status	212
14.2	Regional distribution	213
14.3	Age composition	213
14.4	Gender	215
14.4.1	Gender in the total series	215
14.4.2	Gender in the West Bank	215
14.4.3	Gender in the Gaza Strip	215
14.4.4	Gender according to aetiology	216
14.4.5	Gender according to age cohorts	216
14.5	Pedigrees and sibships	217
14.6	Patients by aetiology and type of residence	218
SECTION 15	VISUAL ACUITIES	219
15.1	Introduction	219
15.2	Categories of visual acuities	223
15.2.1	Category '1'	223
15.2.2	Category '2'	225
15.2.3	Category '3'	225
15.2.4	Category '4'	226
15.2.5	Category '5'	226
15.2.6	Patients with Light Perception	227

15.2.7	Category '6'	227
15.2.8	Category '7'	227
15.2.9	'Blindness'	228
15.2.10	Combined SVI and blindness	228
15.2.11	Graphical summary	228
15.3	Visual impairment in children	230
15.4	Clinical conditions in the visual categories	232
15.4.1	Pathologies in category '1'	232
15.4.2	Pathologies in category '2'	232
15.4.3	Pathologies in category '3'	233
15.4.4	Pathologies in category '4'	233
15.4.5	Pathologies in category '5'	235
15.4.6	Pathologies in patients with PL	235
15.4.7	Pathologies in category '6'	236
15.4.8	Pathologies in category '7'	236
15.5.9	Pathologies in the 'blind' category	236
SECTION 16	ANATOMICAL CLASSIFICATIONS	239
16.1	Introduction	239
16.2	Retina	245
16.3	Lens	246
16.3.1	Lens as a primary site for pathology	246
16.3.2	Lens conditions as a secondary cause	246
16.4	Whole globe	247
16.4.1	Congenital glaucoma	247
16.4.2	Microphthalmia and anophthalmia	248
16.4.3	Phthisical, disorganised and removed eyes	248
16.5	Cornea	250
16.6	Optic nerve	251
16.7	Uvea	252
16.8	'Globe Appears Normal' category	253

16.9	Other categories	253
SECTION 17 AETIOLOGICAL CLASSIFICATIONS		255
17.1	Aetiological factors	255
17.2	Distribution of aetiological groups	257
17.3	Hereditary factors	258
17.4	Hereditary conditions	259
17.4.1	Hereditary retinal conditions	260
17.4.2	Hereditary lens conditions	261
17.4.3	Other genetic conditions	262
17.5	Non-hereditary causes	262
17.5.1	Distribution	262
SECTION 18 NON-HEREDITARY CAUSES		263
18.1	Introduction	263
18.2	Pathologies in the non-hereditary conditions	263
18.3	Prenatal factors	264
18.3.1	Causations	264
18.3.2	Gender in prenatal conditions	265
18.3.3	Anatomical sites	265
18.4	Perinatal and neonatal causes	266
18.5	Postnatal factors	267
18.6	Undetermined aetiologies	270
SECTION 19 COMMON CLINICAL CONDITIONS		271
19.1	Congenital cataract	271
19.1.1	Patients and sibships	271
19.1.2	Age distribution	272
19.1.3	Gender	272
19.1.4	Inheritance	272

19.1.5	Aphakia	273
19.1.6	Posterior capsular fibrosis	273
19.1.7	Visual acuities	274
19.1.8	Prevalence and incidence	274
19.1.9	Association with other ocular conditions	274
19.1.10	Associated systemic findings	274
19.1.11	Family data	276
19.2	Ectopia lentis	276
19.3	Congenital glaucoma	279
19.3.1	Prevalence	279
19.3.2	Demography	279
19.3.3	Age distribution	279
19.3.4	Gender	279
19.3.5	Clinical characteristics	279
19.3.6	Visual acuities	280
19.3.7	Inheritance	280
19.3.8	Associated findings and conditions	280
19.4	Microphthalmos/anophthalmos	285
19.4.1	Clinical types	285
19.4.2	Regional distribution of cases	285
19.4.3	Age distribution	286
19.4.4	Gender	286
19.4.5	Inheritance	286
19.4.6	Prevalence	287
19.4.7	Associated findings and conditions	287
19.5	Congenital corneal conditions	289
19.5.1	Clinical pattern	289
19.5.2	Congenital corneal oedema	289
19.6	Hypopigmentation: Albinism and albinoidism	290
19.6.1	Prevalence	290
19.6.2	Gender	290

19.6.3	Clinical types and associated conditions	290
19.6.4	Visual morbidity	292
19.6.5	Inheritance	292
109.7	Retinal dystrophies	292
19.8	Progressive cone and cone rod dystrophies	292
19.8.1	Patients and pedigrees	292
19.8.2	Prevalence	292
19.8.3	Age distribution and gender	293
19.8.4	Visual acuities	294
19.8.5	Clinical subtypes	294
19.8.6	Inheritance	294
19.8.7	Types, ocular and systemic associations	294
19.9	Stationary cone disorders - achromatopsia	297
19.9.1	Patients and prevalence	297
19.9.2	Gender	297
19.9.3	Visual acuities	298
19.9.4	Associated findings	298
19.9.5	Sequence and ranks of patients in achromatopsia	298
19.9.6	Inheritance	298
19.10	Rod cone disorders	298
19.10.1	Distribution of patients	298
19.10.2	Age range	298
19.10.3	Gender	300
19.10.4	Prevalence	300
19.10.5	Clinical types	300
19.10.6	Visual acuities	302
19.10.7	Inheritance	302
19.10.8	Birth ranks and sequence of patients	302
19.11	Vitreo-retinopathies	302
19.12	Isolated macular degenerations	306
19.13	Degenerative myopia	308

19.14	Summary of associated conditions in the whole series	316
SECTION 20	CONSANGUINITY AND INHERITANCE	319
20.1	Introduction	319
20.2	Consanguinity in the Series	319
20.3	Consanguinity by aetiological cohorts	321
20.4	Consanguinity over the decades	321
20.5	Types of first cousin marriages	323
20.6	Consanguinity in the clinical condition	324
20.7	Modes of inheritance	326
SECTION 21	PREVALENCE AND FAMILY FIGURES	328
21.1	Prevalence of blindness and visual impairment	328
21.2	Prevalence of common conditions	328
21.3	Family information	330
21.3.1	In the whole series	330
21.3.2	In rod-cone sibships	331
21.3.3	In cone and cone rod sibships	331
21.3.4	In congenital cataract sibships	332
21.3.5	In congenital glaucoma sibships	332
21.3.6	In the whole non-hereditary cohort	333
21.4	Mortality in the total cohort	333
21.5	Figures and ratios in the non-hereditary conditions	334
<u>CHAPTER 5: CONCLUSIONS</u>		
SECTION 22	DISCUSSION	335
22.1	The survey	335
22.2	Possible bias	336

22.2.1	Bias in the school age cohorts	336
22.2.2	Bias in the adults cohorts	337
22.3	Patients and schools	337
22.4	Sex ratio	338
22.4.1	Regional variation	338
22.4.2	The West Bank	338
22.4.3	The Gaza Strip	339
22.5	Pedigrees and sibships	340
22.6	Visual acuities and prevalence of blindness	341
22.7	Site of pathology	347
22.8	Aetiologies	356
22.9	Hereditary conditions	356
22.10	Non-hereditary conditions	357
22.10.1	Prevalence	357
22.10.2	Comparison to worldwide data	360
22.10.3	Prenatal conditions	366
22.10.4	Perinatal Conditions	366
22.10.5	Postnatal (childhood) conditions	367
22.11	Consanguinity	368
22.12	Congenital cataract	370
22.12.1	Prevalence	370
22.12.2	Aetiology	371
22.12.3	Mode of inheritance	372
22.12.4	Visual morbidity	372
22.12.5	Prevention	373
22.12.6	Ectopia lentis	373
22.13	Congenital glaucoma	374
22.13.1	Prevalence	374
22.13.2	Mode of inheritance	375
22.13.3	Sex ratio	376
22.13.4	Clinical characteristics	377

22.13.5	Visual morbidity	377
22.13.6	Associated findings and conditions	378
22.14	Small eyes (micro/anophthalmia and coloboma)	378
22.14.1	Prevalence	378
22.14.2	Cataract and microphthalmia	379
22.14.3	Gender	379
22.15	Hypopigmentation: albinism and albinoidism	380
22.16	Retinal dystrophies	381
22.16.1	Introduction	381
22.16.2	Prevalence and subtypes	381
22.16.3	Gender	382
22.16.4	Visual morbidity	384
22.17	Avoidable blindness	385
22.18	Inheritance patterns	389
22.19	Marriage patterns	391
22.20	Childhood blindness in the OPT	396
22.21	Other aspects of the survey	397
22.21.1	Dental associations	397
22.21.2	Clinical details of retinal dystrophies	397
22.21.3	Red filters for conditions with photophobia	398
22.21.4	Intelligence and educational performance	398
22.21.5	Other Aspects	399
22.22	Comparison between the WB and the GS	404
22.22.1	Introduction	404
22.22.2	Demographical aspects	404
22.22.3	Gender differences in clinical conditions	407
22.22.4	Difference in the prevalence of conditions	408
22.23	Associated conditions and mentation	410
22.24	Recommendations	411
22.25	Overall	412

SECTION 23	SUMMARY	414
	BIBLIOGRAPHY	417
	APPENDICES	479
Appendix 1	Publications and Presentations arising from the thesis	479
Appendix 2	Protocol Forms	
	Family Information Sheet	483
	Patient's Examination Sheet	484
	Report to social services	485
Appendix 3	Copies of published papers	
	A progressive cone rod dystrophy and amelogenesis imperfecta: a new syndrome	486
	Cone rod congenital amaurosis associated with congenital hypertrichosis: an autosomal recessive condition	490
	Congenital-onset chorioretinal dystrophy associated with high myopia	498
	Increased band sharing in DNA finger prints of an inbred human population	504
	Identification of a locus on chromosome 2q11 at which recessive amelogenesis imperfecta and cone rod dystrophy cosegregate.	511
