

**Plate 27: Bilateral syndromatic ectopia lentis (lenses subluxated infra temporally) – a new association: abnormal genitalia, feminine complexions, coarse scalp hair, flat feet, undescended testicles and educational subnormality**

**Plate 28:  
Associated dental  
abnormality in the  
above patient**

**Plates 29a and 29b: Abnormal genitalia and undescended testicles with fat filled scrotum in the above patient (tope left) and abnormal genital morphology in his younger bother who lacked all the other features of the syndrome - note the incomplete labia-like appearance and empty scrotum**
